DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on May 19, 2006 has been entered. Claims 1, 3, 8, 10 and 12 have been amended. Claim 7 has been cancelled. No claim has have been added. Claims 1, 3, 5, 6 and 8-13 are still pending in this application, with claims 1 and 6 being independent.

Allowable Subject Matter

2. Claims 1, 3, 5, 6 and 8-13 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Applicant claims a vehicle lamp assembly having a reflector, a light source a lens, and a reflective glare-reducing shield. The shield is rotated within a plane generally perpendicular to the optical axis of the reflector, between a first and a second position, the second position producing a lower illumination level in a foreground area, than the first position. The shield includes a ring with a vacant center, teeth arranged about the ring, and a section protruding into the center of the ring. A method of illumination utilizing such shield is also claimed.

Alphen (U.S. Pat. 4,075,469), **Miyauchi et al.** (U.S. Pat. 4,875,141), **Nakazawa et al.** (U.S. Pat. 4,922,390), **Ikegami et al.** (U.S. Pat. 5,158,352), **Jones** (U.S. Pat. 5,426,571) and **Taniuchi et al.** (U.S. Pat. 6,663,270) disclose vehicle lamp assemblies having means to change the illumination pattern of the assembly in response to a sensed/desired condition, the means for changing the illumination pattern including a

masking element rotated in a plane generally perpendicular to the axis of the lamp assembly, such element having teeth arranged about the element. However, the cited references fail to disclose individually, or suggest in combination, a masking element including a ring with a vacant center, teeth arranged about the ring, and a section protruding into the center of the ring.

No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically a reflective glare reducing shield rotated between a first and a second position, within a plane generally perpendicular to the optical axis of the reflector, such shield including a ring with a vacant center, teeth arranged about the ring, and a section protruding into the center of the ring.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
